

ROBUST REGISTRATION MANAGEMENT FOR EDUCATION & TRAINING

What a Complete Registration Management System Looks Like

Learning Stream streamlines the connection between you and your learners with robust registration management software.

Calendars and class pages

Format calendars and class descriptions with your branding. Include images, maps, attachments, and links to other information.

Responsive pages

The pages you design in Learning Stream automatically re-size to fit any mobile device, including smart phones and tablets.

Online payment

Integrate with any of more than a dozen payment gateways. Track payment for registrants, issue refunds, manually enter data, set up discounts and issue statements and invoices.

Reporting

Track and export (print, email, format in charts and graphs) data pertaining to registrant listings, registration question responses, financials and other registrant and event information.

Evaluations

Design customized evaluations, weight-score questions and even tie completion to an objective (e.g., receiving a certificate of completion) to improve participation.

Complex fee scenarios

Apply fees based on registration type and date, multi-class and student discounts, question responses and more.

Oh, there is so much more →

**Integration**

Extract registration data and import into other systems such as your LMS.

**CE tracking**

Track continuing education (CE) credits of various types by class, print CE transcripts, export CE summary reports and much more.

**Flexible Registration Forms**

Ask any questions you need to collect key demographic data and fees.

**Single Sign-on**

Redirect registrants to secure, remote web pages hosted on your website to authenticate log-in credentials.

**Registration imports**

Bulk import registration data and add to a current event or import and simultaneously create a new class.

**Security**

Keep your data protected through password protocols, transport layer security (TLS) and PCI-compliant environment.

Learning Stream wants to make your registration management process as efficient as possible. That means a ton of listening on our part to ensure we understand your unique needs and how best to apply Learning Stream's robust functionality.

We offer the most feature-rich solution for the education and training market, so we train new users, guide them through the setup process, and even perform an audit before the first event goes live. We continue to support customers through their experience with Learning Stream, with live support that responds quickly.

We encourage customer feedback – it's how we built and improved our software over the years. We do our best to keep an ongoing conversation with customers through our support staff, newsletter, blog, constantly updated What's New and Help sections within our software, and periodic one-on-one communications with customers.

Enough about us. We'd love to hear from you, learn more about your challenges and see if we are the right solution. Use the information below to set up a conversation or live demo.
